Wire Rope Winch

The LiftinGear Wire Rope Winch is a lightweight, manually operated winch designed for lifting, pulling and securing heavy loads. With a durable aluminium body, forward and reverse levers, and replaceable shear pins to help prevent overloading, it offers a versatile solution for a range of lifting and pulling applications.

SPECIFICATIONS

- Maximum Lifting Capacity: 1,600 kg
- Maximum Pulling Capacity: 2,400 kg
- Operation: Manual, hand-operated
- Body Material: Aluminium
- Overload Protection: Replaceable shear pins
- Wire Rope Installation: Disengageable rope clamp system
- Traceability: Individual serial number for each winch

FEATURES

- Forward and reverse levers for controlled lifting and pulling
- Lightweight aluminium body for easier handling
- Replaceable shear pins to help prevent overloading
- Disengageable rope clamp system for easy wire rope installation
- Suitable for lifting, pulling and securing loads
- Individual serial number for traceability
