8 CRM Compressor

The Clarke Rebel Compressor is a heavy-duty, oil-lubricated compressor designed to provide compressed air for a range of equipment and applications. With a 50-litre receiver, 10 bar maximum pressure and 8 CFM air displacement, it is suitable for use with air tools, spray guns and other compressed-air equipment. It features automatic pressure control, an adjustable output pressure regulator and thermal overload protection for reliable operation.

SPECIFICATIONS

- Rotation Speed: 2850 rpm
- Max Pressure: 10 bar
- Air displacement: 9 cuff/min
- Electric Motot: 2 ½ hp (1.8kW)
- Nominal Rating: 25amps
- Receiver: 50 LTR
- Fuse Rating: 25 Amps

FEATURES

- Automatic pressure cut-in and cut-out
- Adjustable output pressure regulator
- Outlet pressure gauge
- Pressure relief valve for no-load starting
- Thermal overload protection
- Automatic condensate drainage on the Rebel 60
- Regulator/filter on the Rebel 60
- Air receiver drain valve
- Oil-lubricated operation
- Suitable for air tools, spray guns and other compressed-air equipment
- Automatic pressure control for continuous operation
