RIDGID 161 Receeder

The RIDGID 161 Receding Geared Threader is a heavy-duty manual threading tool designed for threading 4" to 6" pipes. Its geared design and secure workholder provide reliable, controlled threading, making it suitable for larger pipework and on-site applications.

SPECIFICATIONS

- Thread Type: NPT
- Threads per Inch: 8
- Nominal Capacity: 4–6" (100–150 mm)
- Weight: 71.7 kg

FEATURES

- Receding geared threader design for efficient pipe threading
- Adjustable for different pipe sizes for versatile applications
- Tapered and straight thread adjustment for different threading requirements
- Cam-type workholder securely grips the pipe during threading
- Clutch mechanism helps prevent jamming at the end of the thread
- High-speed dies included for reliable threading performance
- Adjustable die head for accurate thread sizing
- Compatible with RIDGID threading machines and power drives
