TESTO 417

The Testo 417 Kit 1 is a compact 100 mm vane anemometer designed to measure air velocity, volume flow and temperature at vents, grilles and air handling outlets. The kit includes a funnel set for more reliable volume flow measurements at irregular outlets.

SPECIFICATIONS

- Model: Testo 417 Kit 1
- Vane Diameter: 100 mm
- Air Velocity Range: 0.3–20 m/s
- Air Velocity Accuracy: ±(0.1 m/s + 1.5% of mv)
- Temperature Range: 0–50°C
- Temperature Accuracy: ±0.5°C
- Volume Flow Range: 0–440 m^3/h (with funnel set)
- Sensor: NTC
- Connectivity: Bluetooth
- Battery: 3 × AA
- Battery Life: Up to 50 hours
- Weight: 243 g
- Housing: ABS/PC with TPE protection
- Display: Backlit

FEATURES

- 100 mm Integrated Vane: Measures air velocity, volume flow and temperature
- Funnel Set Included: Allows volume flow measurements at grilles and irregular outlets
- Testo Smart App Compatible: Bluetooth connection for displaying, configuring and documenting readings
- Automatic Average Calculation: Calculates time and point average values
- Data Hold Function: Holds readings on screen for easier viewing
- Backlit Display: Suitable for use in low-light conditions
- Compact & Robust Design: Lightweight construction with TPE protection
- 50-Hour Battery Life: Provides extended use between battery changes
