Cable Rollers

The Heavy-Duty Cable Roller is designed to guide and protect SWA and other electrical cables up to 130mm in diameter during cable pulling installations. Its robust zinc-plated steel frame, waisted steel roller and sealed ball bearings help provide smooth cable movement, reduce friction and keep cables securely positioned in trenches.

SPECIFICATIONS

- Maximum Cable Diameter: 130 mm
- Frame Construction: Zinc-Plated Steel
- Roller Diameter: 110 mm
- Height: 225 mm
- Width: 225 mm
- Length: 300 mm
- Weight: 3.85 kg

FEATURES

- Heavy-Duty Cable Roller
- Suitable for Cables up to 130mm
- Robust Steel Frame
- Waisted Steel Roller
- Sealed Ball Bearings
- Smooth Cable Movement
- Reduces Cable Friction
- Protects Cables During Installation
