HILMOR Copper Bender

The Copper Bending Machine BC42 is a robust, UK-manufactured pipe bender designed for precise, ripple-free bending of copper tube from 15 to 42 mm. Supplied with formers and guides for all five sizes, it provides reliable, accurate bends for plumbing installation and professional applications.

SPECIFICATIONS

- Material: Copper
- Bending Capacity: 15, 22, 28, 35 and 42 mm
- Height: 1150 mm
- Weight: 35 kg
- Manufactured: UK
- Included Tooling: 15, 22, 28, 35 and 42 mm formers and guides
- Extension Handle: Soft-grip handle included

FEATURES

- Precision Bending: Precision-machined formers provide accurate, consistent bends.
- Ripple-Free Results: Designed to produce smooth, clean bends in copper tube.
- Solid Construction: Square-section fabrication provides a stable and robust platform.
- Adjustable Bending Lever: Allows fine adjustment for controlled bending.
- Compact Design: Designed to fit into most car boots for easier transportation.
- Built-In Carrying Handle: Makes the machine easier to move between locations.
- UK Manufactured: Proudly manufactured in the UK for professional-quality results.
