ND-54 Tube End Notcher

ND-54 Tube End Notcher is used for cutting and dimpling the branched tube ends to enable the best possible flow characteristics.
This is an accessory to the T60 T-Drill.

SPECIFICATIONS

- Model: ND-54
- Branch tube sizes: 12, 14–16, 18, 22, 28, 35, 42 and 54mm
- Corresponding inch sizes: ½", ¾", 1", 1¼", 1½" and 2"
- Compatible with: T-DRILL T-60 110V
- T-60 tube range: 15–54mm

FEATURES

- Forms branch tube ends to match the inner curve of the run tube
- Cuts a half-moon shaped section from each side of the branch tube
- Provides maximum flow through the tee connection
- Simultaneously forms two dimples in the branch tube
- First dimple acts as a depth stop during installation
- Second dimple provides a visual inspection point after brazing
- Helps create an inspectable, high-quality brazed joint
- Designed as a complement to the T-DRILL tee forming system
