Rotabroach Cobra 65mm

The Cobra makes it easier to drill large, accurate holes in steel and other ferrous metal, particularly where using a conventional drill would be difficult or impractical. Its powerful magnetic base holds the machine securely to the workpiece, making it ideal for on-site fabrication, structural steelwork, maintenance and workshop applications where portability, drilling capacity and stability are important.

SPECIFICATIONS

- Model Number: CM/200/1AX / CM/200/3AX
- Motor Power: 1400W
- 110V Full Load: 14 amps
- 230V Full Load: 6 amps
- No-Load Speed: 160–640 rpm
- Maximum Hole Cutting Capacity: 65mm diameter × 50mm deep
- Magnetic Adhesion: 1200kg
- Spindle Bore: 19.05mm (3/4")
- Overall Height: 570mm
- Overall Width: 190mm (excluding bottle)
- Overall Length: 300mm
- Net Weight: 19.8kg
- Safety Features: Clutch and electronic overload protection

FEATURES

- Powerful 1400W motor for demanding drilling applications
- 1200kg magnetic adhesion for secure drilling on steel
- Variable speed control for greater control across different applications
- 2-speed gearbox for improved versatility
- Through-spindle coolant system with automatic coolant bottle
- Integrated magnet and motor controls
- Clutch and electronic overload protection for added safety
- Ergonomic carry handle for easier transportation
- Lightweight design at just 19.8kg
- Comprehensive safety features
- Supplied with carry case and accessories
