Victaulic VE416 AGS Rollers

The 14–16″ rollers are used with the VE416 Roll Grooving Tool to support and guide 14–16″ pipe during the grooving process. They help keep the pipe correctly positioned as the VE416FSD forms the groove, providing controlled and consistent results.

SPECIFICATIONS

- Pipe Size: 14–16" / 350–400 mm
- Pipe Material: Steel and stainless steel

FEATURES

- Pipe Support: Helps support and guide the pipe during the grooving process.
- Accurate Positioning: Keeps the pipe correctly positioned while the groove is formed.
- Consistent Results: Helps produce controlled, accurate and consistent grooves.
- VE416 Compatible: Designed for use with the Victaulic VE416 Roll Grooving Tool.
