Pipe Freezer 420D

The Freeze Master 420D is a powerful, electronically controlled pipe freezing machine designed for domestic and light industrial use. It can freeze pipes from 8–42 mm and features a self-regulating system that maintains the required temperature. Its sealed system continually recycles the gas, so replacement canisters are not required.

SPECIFICATIONS

- Powerful, fast, electronically controlled freezing
- Designed for domestic and light industrial use
- Self-regulating - able to control and maintain temperatures
- Sealed system - the gas is continually recycled. no need for replacement canisters
- Freezes 8mm to 42mm pipes

FEATURES
