TUBELA Copper Bender

The Tubela 15–54mm Ratchet Assisted Copper Bender is designed for efficient bending of copper, stainless steel, aluminium, conduit and mild steel tube. Its ratchet-assisted mechanism provides greater mechanical advantage for easy, single-handed bending, while the optional stand or bench/vice mount allows full-length tubes to be bent horizontally.

SPECIFICATIONS

- Tube Size: 15–54 mm
- Suitable Materials: Copper, stainless steel, aluminium, conduit and mild steel
- Maximum Tube Diameter: 54 mm O.D.
- Operation: Ratchet-assisted, single-handed
- Mounting Options: Portable S1 Stand or Bench/Vice Mount

FEATURES

- Ratchet-assisted bending for easier tube bending
- Suitable for copper, stainless steel, aluminium, conduit and mild steel tube
- Bends steel and stainless steel tube up to 54 mm O.D.
- Single-handed operation without the need for an extension handle
- Mechanical advantage reduces effort when bending
- Can be used with the Portable S1 Stand or Bench/Vice Mount
- Horizontal bending allows full-length tube to be bent
